## Objective

---

Front-End Developer with 4+ years of experience crafting user-centric interfaces. Skilled in HTML, CSS, Tailwind Css, JavaScript, TypeScript, ReactJs, Nextjs, Vue and Nuxt to build visually appealing and responsive web applications. Collaborate effectively with clients and back-end developers to deliver exceptional user experiences

## Experience

---

### Arravo

**August 2024 - Ongoing**

*Front End Developer.*

*Lagos State.*

- Spearheaded the integration of Google OAuth for secure and streamlined user authentication, collaborating with backend teams to ensure a seamless user experience.
- Built dynamic and high-performance web applications using React, Vite, and TanStack Router, reducing page load times and improving overall user navigation.
- Implemented real-time communication features with Socket.IO, enabling instant updates and fostering user engagement through live interactions.
- Leveraged Redux and React Query for state and data management, improving performance and scalability in handling complex client-side data fetching and caching.
- Delivered visually appealing and responsive UI components by utilizing Tailwind CSS and ShadCN, optimizing user experience across different devices and screen sizes.

### **United State of African (usafrika)**

**March 2022 - March 2024**

*Front End Engineer.*

*Lagos State.*

- Worked closely with Quality Assurance Engineers to conduct rigorous testing of new pages and products, ensuring swift issue resolution within a 48-hour timeframe, and guaranteeing seamless user experiences.
- Utilized state management libraries such as Redux to efficiently manage the application's state, leading to improved data flow and maintainability in complex web applications.
- kept up with best practices, recommended improvement to 1 website to provide an optimal experience for customers, and Performed bug fixes.
- designed and consumed efficient API endpoints, optimizing data fetching processes and reducing unnecessary server requests for enhanced overall system efficiency.

### HealthGO ICT Firm

**March 2021 - January 2022**

*Front End Engineer.*

*Lagos State.*

- Utilized HTML, CSS, JavaScript, and React.js to create 6+ responsive websites, landing pages, and applications from concept through deployment and mobile-first approach, increasing mobile traffic by 20%.
- Design, develop, and code web applications for customer accounts, which includes debugging issues, diagnosing root causes, and identifying solutions

## Projects

---

NITT [Link](#) | *ReactJs, Redux, TypesCRIPT, HTML/CSS, TailwindCss*

January 2025

**Nigerian Institute of Transport Technology** is a Nigerian Institute of Transport Technology that systematically provides and offers research and consultancy services to private and public transport agencies for the achievement of management excellence in all modes of transport in Nigeria and the West African Sub-region.

Scudo [Link](#) | *Nuxtjs, Vue, Pinia, Typescript, TailwindCss*

February 2025

Scudo is a comprehensive insurance platform that helps you find the coverage you need to protect yourself, your loved ones, and your assets. With Scudo, you can easily compare and contrast insurance products from leading companies to find the policy that fits your specific needs and budget. Whether you're looking for personal, automotive, home, or business insurance, Scudo has you covered.

CareMore [Link](#) | *ReactJs, Convex, Tailwind Css, Shadcn , Typescript*

November 2024

**CareMore** is an e-commerce platform for skincare products. It features a clean, elegant design with a focus on premium skincare bundles. The homepage highlights an **"All You Need in One Pack"** offer, which includes essential skincare items like moisturizer, sunscreen, and cleansers. Users can shop directly, read customer reviews, and navigate to their **current orders** or **account**. The color scheme and layout suggest a modern, beauty-focused shopping experience.

Loca [Link](#) | *NextJs, firebase, Tailwind Css, Shadcn , Typescript , Gemini, vertex, google cloud*

may 2024

**LocaAI** Loca is a localized service finder app designed to simplify how users discover and access local services. Powered by the Gemini API, Foursquare API, and Google Places, Loca provides users with detailed information about local service providers, such as names, contact information, and locations. Instead of storing data in Firebase, Loca fetches real-time service details from the web, enhancing user experience with accurate and up-to-date results. It's built using Next.js, TypeScript, and deployed on Vercel.

Christina [Link](#) | *Javascript, ReactJs, Zustand, HTML/CSS, Tailwind Css, Shadcn*

January 2023

This website isn't your average photographer portfolio. It's a **cutting-edge platform** designed to showcase the photographer's work in a captivating and modern way. Expect a focus on **high-quality visuals** and a **sleek, user-friendly design** that lets their photography shine.
